

ALCAMIZER™ / MAGCELER™

“ALCAMIZER™” and “MAGCELER™” are Hydrotalcite-like compounds of Magnesium and Aluminum. These products are used as highly safe heat stabilizer in the heavy metal free PVC stabilizer systems.

【Product Features】

- ① High heat stability
- ② High safety
- ③ High transparency
- ④ Good insulation properties
- ⑤ Good weatherability
- ⑥ Good technological property
- ⑦ Non-pollution with sulfide

【Typical Data】

	ALCAMIZER™ 1	MAGCELER™ 1
Molar Ratio of MgO/Al ₂ O ₃	4.00	4.23
Loss on Drying (%)	0.2	0.2
Specific Surface Area (BET) (m ² /g)	8	9
Particle Size Distribution		
Average %50 (μm)	0.56	0.49
Over 5μm (vol%)	0.0	0.0

Package	NET weight
PE bag	20 kg
