

## PYROKISUMA™ 5301 / PYROKISUMA™ 3320

“PYROKISUMA™ 5301” and “PYROKISUMA™ 3320” are high purity and low active Magnesium Oxide.

This products have the superior thermal conductivity filler, and are able to be highly filled to various rubbers and polymers.

### 【Grade】

- PYROKISUMA™ 5301 : Average particle size of approximately 2μm, good technological property, and fine surface of molding molded products.
- PYROKISUMA™ 5301K : This is high water resistance product that is covered “PYROKISUMA™ 5301” by surface treatment agent.
- PYROKISUMA™ 3320 : Average particle size of approximately 20μm, it contributing to high flowability and high filling property.

### 【Typical Data】

		PYROKISUMA™ 5301	PYROKISUMA™ 5301K	PYROKISUMA™ 3320
MgO	(%)	99.96	99.97	99.97
Loss on Ignition	(%)	0.3	0.2	0.1
CaO	(%)	0.04	0.03	0.03
